Alt-N Technologies Meets Bureau of Industry & Security Export Compliance Requirements with the Global Patriot TM **Solution**

October 28, 2008

Patriot Techcorp ("Patriot") announces Alt-N Technologies as an export industry client using the Global Patriot TM Export & Import Special License Package designed to ensure compliance for the Export & Import Industry legislation issues for Anti-Money Laundering (AML), Anti-Terrorism, the USA PATRIOT Act, Office of Foreign Assets Control (OFAC), Bank Secrecy Act (BSA), and other related global governmental regulatory requirements.

The Export & Import Special License Package includes a data list package with requirements from the U.S. Bureau of Industry and Security ("BIS"). Companies, entities, and persons included in the data lists are sanctioned by the U.S. government and may not export goods from the United States or receive exported goods from the United States. Exporters are responsible for ensuring that all export transactions are properly authorized. With the threat of increased terrorism incidents around the world, exporters need to be confident that they are not dealing with any person or entity registered on those lists.

Patriot Techcorp's product innovation for its compliance solutions has continued from the initial release of the Global Patriot TM program in 2006, designed to specifically address U.S. government regulations, to the release of Special Licensing Packages for the Global Patriot TM program in 2007 and 2008 designed to address specific governmental data lists as mandated for regulatory compliance per industry segments.

"We selected the Global Patriot TM solution because of its strength in functionality, assistance with compliance processing, and ability to provide a web-based interface to our online ordering portal," said Traci DeStena, Director of Accounting for Alt-N Technologies. "This will ensure that every export transaction is automatically checked for BIS compliance prior to completion. "

About Alt-N Technologies

Alt-N Technologies develops affordable and secure messaging and collaboration solutions used by businesses in over 90 countries and 25 languages worldwide. The company's flagship solutions, the MDaemon® Email Server for Windows and the SecurityGateway for Exchange/SMTP Servers, are reliable products that install in minutes, include the latest email security authentication technologies, and require minimal support and maintenance to operate.
