

Patriot Techcorp Releases the Global Patriot™ Program Version 2 with Enhanced Features & Functionality

October, 2008

Patriot Techcorp' product innovation for its compliance solutions has continued from the initial release of the Global Patriot™ Program in 2006, designed to specifically address the global legislation issues for Anti-Money Laundering (AML), Anti-Terrorism, the USA PATRIOT Act, Office of Foreign Assets Control (OFAC), Bank Secrecy Act (BSA), and other related governmental regulatory requirements, to the present release of the Global Patriot™ Program Version 2.

The Global Patriot™ Program Version 2 offers enhanced features & functionality that provide feature enhancements such as:

- An upgrade to Microsoft .NET Framework version 2.0 which enables the program to work with all operating systems including newer release computers utilizing MS Vista O/S
- Improved networking functionality and use of shared & networked data
- An increased number of industry specific data list packages to select from designed to address specific compliance needs for each industry segment
- Enhanced search result review features providing additional options for account/transaction type and action selections designed to address needs for a myriad of specialist industry requirements
- Enhanced reports that uniquely identify all results in an easy-to-read format (as recommended by Examiners & Auditors)
- An overall updated program look and feel

Additionally, the Global Patriot™ Program Version 2 is designed to provide compliance processing for all regulated industries in an accurate and expeditious manner by utilizing a unique search algorithm that provides accurate comprehensive searches of large batch data files within seconds.

Product Demo provided upon request.
