

## **Patriot Techcorp Releases the OFAC Patriot™ Server Program v2.0.1**

**May, 2009**

Patriot Techcorp' product innovation for its compliance solutions has continued from the initial release of the OFAC Patriot™ & FinCEN Patriot™ programs in 2003, designed to specifically address U.S. Government regulations, to the release of the OFAC Patriot™ Server Program v2.0.1 to minimize the due-diligence on the part of the network administrator.

- The OFAC Patriot™ Server Program v2.0.1 was developed specifically to be installed on a network server providing the network administrator with the ability to manage the shared network file folders which contain the OFAC data search lists, accept lists, input batch file and output report files.
- The OFAC Patriot™ Server Program v2.0.1 Setup function provides a feature to select a time to automatically connect to the OFAC Server on a daily basis in order to obtain the most recent OFAC SDN/PLC lists as provided by the OFAC division of the U.S. Department of Treasury.
- The OFAC Patriot™ Server Program v2.0.1 defaults are set to eliminate all file update popup reminder messages which can be changed, if necessary, in the Setup tab.

**\*\*\*Note:** The Patriot Software installation package contains a .NET Framework executable file that automatically detects if the users system has the necessary .NET Framework version 2.0 installed which is required to effectively utilize the Patriot Software.

In the event the .NET Framework version 2.0 is not detected on the users system during the Patriot Software installation process, the .NET Framework version 2.0 will automatically be installed on the system and then the executable file will self destruct and delete itself from the users system. This process is completed in order to protect the hard disk resources of the users system by minimizing use of disk space.

**Product Demo provided upon request.**

## **About Patriot Techcorp**

Patriot Techcorp, Inc. is a software research and development and network security management services firm that specializes in combining advanced technology with vision and innovation to produce quality products and cost-effective solutions.
